

VASTR® Nail sealing tape is a single-sided self-adhesive PE foam tape for the waterproof sealing of roof membranes in combination with battens.

Application

VASTR® Nail sealing tape should be used for watertight sealing of roof membranes under wooden slat on roof pitches less than 25°. The VASTR® Nail sealing tape is wider than the standard batten, keeping the batten clear of the roof membrane. This keeps the batten dry and water will not be able to pass through perforation of screw or nail.

Installation

To ensure good adhesion, the substrate must be made dust-free. Adhesion of VASTR® Nail sealing tape is not possible on frozen substrates. Apply the VASTR® Nail sealing tape to the roof membrane in vertical strips. Then apply the batten over the center of the VASTR® Nail sealing tape so that both sides of the batten show the VASTR® Nail sealing tape.

Description

VASTR® Nail sealing tape

Size

60 mm x 20 m

Quantity

5 roll / box

Article no.

8106002010

EAN code

8714672005332

Specifications

Color Gray	Adhesion on steel > 5 N / 25 mm
Material PE closed-cell foam laminated with membrane	
Adhesive layer Hot melt adhesive	Cutlass Release liner
Storage Dry, -5 °C to 10 °C	
Temperature resistance -30 °C to + 80 °C	Processing temperature 10 °C
